Welcome Message

Aspiring to study abroad always needs a supplementation of professional guidance and consultation to achieve their goals without any hindrance. Eklavya Overseas welcomes you to an organisation where professionals have gathered to help students who want to study abroad. Our major aim is to give you the opportunity to study the best possible course in the best possible university and get the best scope for a flourishing career. We counsel our students in terms of courses and universities to select from and also support them through all formalities until their whole admission process is completed and they are a part of their dream institution. There are many formalities that go into studying in a foreign country. Our trained staff members help you to go through these formalities and understand the smallest details of foreign education. The students often are confused with the many rules and regulations of foreign education and that is where we guide them and solve their problems. Our top priority is the requirement of our students and we formulate all our plans and programmes accordingly.

About Eklavya Overseas

We at Eklavya Overseas are dedicated to get our students through the best courses in the best universities and in the best countries. For more than six years we have been training students and helping them to study abroad in different countries. Students who seek our guidance are helped by trained counsellors at Eklavya Overseas, from general proficiency tests to individual admission tests of different universities and countries.

We also guide our students to choose an apt career through our career counselling. We do not want our students to make bad choices when it comes to their career and studying abroad. We also brief our students on their needs of financial planning and make sure they interact with former students of the institution they are willing to go to. We also mentally prepare our students about the geography, culture, weather and transportation and hostel facilities of the country that they go to, to pursue their higher education.
Why Eklavya Overseas

Commitment
The numbers of applications registered by foreign universities are in thousands; however, very few out of these applicants actually get the opportunity to study in these universities. When a candidate decides to study abroad there are multiple factors on which his success depends. After looking up universities and choosing their subjects the candidates must often appear for multiple examinations. From language proficiency tests to general proficiency tests or individual admission tests, the candidate has to go through all these hurdles. Even when a candidate has passed these hurdles they have to apply for visa, find hostel accommodation, submit admission fees, plan their finances, etc. Once a candidate has entrusted things in us we guide them through the whole process and increase their success rate exponentially.

Transparency
Even after admission test coaching, as guides our responsibility does not end there. We at Eklavya Overseas are transparent about our services, fees and the areas which will be covered in our services. We make sure that we know everything about our students so that we can get them the best possible course at a reputable university. Once a student signs up with us it is our highest priority to get the student into a reputable institution according to his/her personal ambitions.

Budget Friendly
One of the most daunting things about studying abroad is budget. We help you keep track of all the available scholarships for your preferred course and universities. We help our student’s shortlist universities and courses according to their budget so that they can get through the application process quicker.

Vast Experience
For many years now, we have been guiding students who aspire to study abroad into different institutions in different countries for a variety of courses. After all these years of experience we have forged vital connections with universities all over the world which in turn help serve our new students with their well earned experience.
